FEDERAL DEAL IS CLOSELY WATCHED

Believed That Eastern Visit of Craig Will Bring Results.

NEW SMELTER IS

Water Rights on Heusser Ranch Will Be a Valuable Acquisition.

Word has been received in Ely that good progress is being made in the deal brought out during the call. Closing by which the plans to finance the Fed-quotations and detailed sales follow: eral Ely Copper company in such a manner that the company may go ahead with their extensive plans for the development of the property, and the possible construction of a smelter on the Heusser ranch in Steptoe val-

ley.

Mine Activity.

It is confidently expected that the plans of President Craig will have been consummated before the end of this 1500 at 11 jc; Standard Copper, 600 at 30c; year, and that the opening of 1910 will Federal Ely, 1000 at 20c; McDonaid Ely, bring definite announcements of the Afternoon sales—Great Falls Mines company's policy of expansion and decompany 200 at 5c; Utah Mines, 100 at 5c; Bingham Central-Standard, 500 at 33c; Standard Copper, 3000 at 16c.

bring definite announcements of the company's policy of expansion and development. Activity in the property will follow immediately on the announcement of these plans, it is believed, and the company will then get into the grand march of production, says the Expositor.

The rumer originating in Salt Lake City that the Federal Ely control will pass to the Cole-Ryan combination, refuses to be killed, and continues to gain strength. While Salt Lake mining and stock interests claim to have nothing definite upon which to base their belief that this absorption will be effected, they insist that such a deal is now under way in the East.

Valuable Water Right. Valuable Water Right.

It is pointed out that the immensely valuable water rights and smelter site owned by the Federal Ely in the old Heusser ranch which that company took

Heusser ranch which that company took over several years ago, will be necessary factors in the decision of the Cole-Ryan interests, to construct the hag smelter to handle the ores of independent operatives in this district.

The developments in the Federal Ely business affairs will be watched with closest interest by the entire district, as much is believed to hang on the ultimate results of President Craig's present trip to the East.

LANS FOR LONG SNAKE CREEK TUNNEL Manager George Lambourne of the laly-Judge property reports that everyMay Day ... Mineral Fi PLANS FOR LONG

Manager George Lambourne of the Daly-Judge property reports that everything is running along in good shape at the company's plants in Park City. Since mining has been started on the newly-developed ore bodies on the 1200 lovel, the output of crude ore has been somewhat increased, though Mr. Lambourne states that for the past several days the canyon roads, owing to heavy rains, have been in almost impassable condition.

The details for the driving of the Snake Creek-Daly-Judge tunnel are now assuming definite shape, and in the near future bids will be received and contracts let for the construction work. Mr. Lambourne has great faith in the future of the Park City district, and is of the opinion that conditions up there are improving and that they will continue to improve from now on.

UTAH TO HAVE GOLD DREDGING OUTFIT Tintic Com

J. P. Hite, who has been placer mining on the Colorado river in Glenn's canyon. Garfield county, for a number of years past, was a visitor in this city Monday. Mr. Hite states that there are about eight outfils on the river now and that they are all getting satisfactory results. As yet the methods employed are crude, but assurance has been given that in the near future a party of Chicago capitalists will go into the district install a dredging plant, and work on an extensive scale. The gold values found in the section occur in a sea-wash gravel, and the manner of their original disposition is still largely a matter of conjecture, some claiming that the values have been washed down from the Henry mountains, while others maintain that they were deposited in the long past by glacial disturbances.

TRADING QUIET ON EXCHANGE MONDAY

but There Is Little Demand for Stocks.

The week's trading on the local stock exchange opened quietly. The POSSIBLE OUTCOME day's sales amounted to but 87,170 shares, for which was paid \$36,189.95. Columbus Con. has ceased to command

the attention it did last week, though the price holds firm at from \$1.52½ to \$1.55. Sioux Con. was quite actively dealt in at from 45 to 47 cents, and Colorado was weak at 82 cents.

Among the unlisteds the Ely stocks came in for a big share of the trading, and there were also some new names.

CENTRAL RESPONDING

Cutting Through Good

Grade Ore.

Make Good Progress.

The values in the Clipper shaft, Mr. Hoffman says, will range from 15 per cent to 40 per cent in copper with small values in gold and silver.

Good progress is being made in the Eureka shaft adjoining the pit of the Nevada Consolidated Copper company.

Nevada Consolidated Copper company. This shaft is now down to 230 feet, and is all in the pink rhyolite that lies immediately above the porhyritic ore beds that are being scooped up by steam shovels in the nearby pit.

In the pit, this pink rhyolite is from thirty to fifty feet in thickness. Manager Hoffman believes that within the next thirty or sixty days at the latest, the Eureka shaft will all be in ore. Progress is being made at the rate of about three feet a day.

TO DEVELOPMENT

It is understood that the negotiations between the Utah Copper and the Boston Consolidated Copper interests have been practically completed, whereby the Utah Copper company will take over the Boston Consolidated on the basis of one share of Utah for two and one-half shares of Boston Consolidated stock.

It is expected that an official announcement will be made early next week.

A conference of the parties interested in the bringing about of the merger of several of the principal copper-producing companies was held Tuesday afternoon, and it is said that further progress was made in rounding out the general plan. It is stated on trustworthy authority that the negotiations have not yet advanced to the stage of considering prices at which the various stocks are to be taken over.—Wall Street Summary, Nov. 25.

CLIFF PROPERTY IS IN GOOD CONDITION

Grant Snyder, upon his return from a visit of inspection at the Cliff property, reports splendid progress being made in the work of the development of the mine. The ore body in the middle tunnel has now been followed for a distance of 300 feet, giving a vertical depth on the deposit of from 960 to 1060 feet. Work in other parts of the mine is being prosecuted vigorously, four machines being employed, and Mr. Snyder states that all conditions are very favorable. 5.50

ACTIVITY PREVAILS IN BEAVER COUNTY

in Tunnel Towards Red Warrior.

The recent descoveries of ore bodies. bordering on the sensational, reported in the Red Warrior property in Beaver county, have resulted in a general reof other promising prospects in the are being obtained. One of the best looking of the smaller properties at Beaver, it is said, is the Orphan Boy, and recently a fissure vein was broken into during the work which shows indications of developing into a big ore

Work in Tunnel.

Concerning recent developments the Concerning recent developments the Beaver News says that for some weeks past work has been prosecuted in the new tunnel being driven toward the Red Warrior beddings, which is now in about 300 feet. It was at this point that the ore, which is a good silverlead vein, was broken into. As yet no assay returns have been received, but it is believed that the samples will show good values. The Orphan Boy consists of eleven claims and end-lines the Red Warrior and Mowitza properties.

There is over 1500 feet of under ground work on this property and small deposits of good ore have been found in several places. This new ore vein will be drifted on and fully developed when it is expected that the Orphan Boy will open the phenomenal ore body of the Star district.

INDIAN QUEEN NOW

Another fine fissure, carrying much red fron, has been cut by the Indian Queen company's tunnel, according to word received by Lorin Morrison from Manager David Evans, who has been at the mines in Beaver county several days. The face of the tunnel, which is in 3990 feet, is more highly mineralized than for a long time before. Crosscutting No. 2 fissure has been started.

The King David shaft, 690 feet deep, is in mineralized black lime carrying manganese—the material in which the Horn Silver's bonanza ore body was made. Much tale is coming in, as well as some gypsum, and the ground is generally soft. "The rock looks fine for mineral." Mr. Evans adds.—Beaver County News.

OHIO COMPANY MILL **GIVES SATISFACTION**

Big Tonnage Being Treated Daily.

Manager Colin McIntosh of the Ohio Copper property spent Sunday in an inspection of the company's new milling plant, and Monday expressed him vival of interest in the development self as being very well pleased with seir as being very well pleased with the manner in which the concentrator is running. The first unit of the mill, after having been given a thorough tryout, is now grinding away steadily on 750 tons of ore every twenty-four hours, and though as yet no figures can be given as to the value recoveries, can be given as to the value recoveries, the management is not worrying in the least on that point. The ore being treated now is that taken from near the surface in the mine, and in its drop of over 1000 feet through the chutes to the tunnel level, it is broken up into small sizes, and thus the process of concentration is simplified and a tonnage above the normal capacity of the section of the mill now in operation is being treated. About 1000 tons of ore is being taken through the Mascotte tunnel daily.

Mine Looks Good. Mine Looks Good.

Mine Looks Good.

Mr. McIntosh is well pleased also with the condition of the mine, and states that the recent developments on the Elvina veins give assurance of a practically new mine in the company's ground. The ore body on the Elvina is now four feet wide and the product shows assay values of \$1.80 in gold, 4 per cent copper, 26.2 per cent ron and .6 of an ounce silver. By raising about 200 feet a connection can be made with the Mascotte tunnel, so that the newly developed deposit can be handled as economically and conveniently as the other ores of the mine. The second unit of the mill will be

HAS MORE ORE

The second unit of the mill will be put in commission in about two weeks, and as soon as practicable the entire plant will be in operation. Mr. Melloves that a very bright first accomplishments of his company and privision from Manager believes that a very bright future is now assured.

> Ore and Bullion The ore and buillon report posted Mon-day by McCornick & Co. follows: Ore re-ceived, \$25,000; buillon-shipped, \$49,000; total, \$55,000.
